

PRICE SCHEDULE - 2012

ACUTE MAMMALIAN TOXICOLOGY – GLP¹

P320.UDP Acute Oral Toxicity Up & Down Method (OPPTS 870.1100, OECD 425)

Limit Test – 2000 mg/kg.....	\$1600
Limit Test – 5000 mg/kg.....	\$1070
LD ₅₀	\$3560

P322 Acute Dermal Toxicity (OPPTS 870.1200, OECD 402)

Limit test, 10 rats, 1 level	\$1530
Each additional dose level (if necessary)	\$1500

P330 Acute Inhalation Toxicity (OPPTS 870.1300, OECD 403)

Per exposure level, 10 rats, 4 hour exposure, 14 days whole body or nose only	\$8280
Grinding of solids	\$520
Analytical concentration determination ²	\$6330

P324 Primary Eye Irritation (OPPTS 870.2400, OECD 405)

3 rabbits, 72 hours	\$1360
Each additional day (if necessary)	\$75

P326 Primary Skin Irritation (OPPTS 870.2500, OECD 404)

3 rabbits, 72 hours	\$1510
Each additional day (if necessary)	\$75

P327 Local Lymph Node Assay (OECD 429, OPPTS 870.2600)

5 mice/group, 3 test, 2 control groups	\$7350
4 mice/group, 3 test, 1 control group	\$6250
5 mice/group, 1 test, 1 control groups	\$5310

P328 Skin Sensitization, Buehler (OPPTS 870.2600, OECD 406)

20 test animals with 10 naive controls	
3 inductions with 1 challenge	\$9030
With concurrent positive controls	\$10850
Each rechallenge	\$1370

P329 Skin Sensitization, Maximization (OPPTS 870.2600, OECD 406)

20 test animals with 10 naive controls	\$10370
With concurrent positive controls	\$13600
Each rechallenge	\$1400

ANALYTICAL CHEMISTRY- GLP¹

P800 Storage Stability/Corrosion (OPPTS 830.6317 and 6320)²

1 Active, 1 Year	\$9620
2 Actives (same method), 1 Year	\$12420

P802 Accelerated Storage Stability (OPPTS 830.6317)

1 Active – when conducted with 1 year study	\$4870
---	---------------

P803 Characterization of Active (GLP C of A) ... \$3850

1 Active

P809 Preliminary Analysis (OPPTS 830.1700) POR

P801 Physical/Chemical Properties

- Color and Odor (OPPTS 830.6302 & 6304)
- Physical State (OPPTS 830.6303)
- Oxidation/Reduction (OPPTS 830.6314)
- Flammability (OPPTS 830.6315)
- pH (OPPTS 830.7000)
- Viscosity (OPPTS 830.7100)(OECD 114)
- Density (OPPTS 830.7300)(OECD 101)

Other Physical/Chemical Properties Tests

- Miscibility (OPPTS 830.6319)
- Melting Point (OPPTS 830.7200)(OECD102).....
- Boiling Point (OPPTS 830.7220)(OECD103)
- Dissociation Constant (OPPTS 830.7370) (OECD112)
- Vapor Pressure (OPPTS 830.7950)-static or vp.
- Partition Coefficient (OPPTS 830.7370/7570) (OECD117/107)
- Water Solubility (OPPTS 830.7840)(OECD105)
- UV-Visible Spectrum (OPPTS 830.7050) (OECD101)
- Stability to heat (OPPTS 830.6313).....
- Stability to heat & metal ions(OPPTS 830.6313)

Sample Disposition:

- Sample return
- Hazardous sample disposal.....
- Hazardous sample return.....

POR – Price on Request

¹ Prices are based on the use of PSL's standard protocols and report formats. The use of custom study designs, protocols and/or report formats may result in additional charges. These prices include archiving of data at PSL's facility for a period of 5 years. Archiving of data beyond this time will be charged to the Study Sponsor on an annual basis.

² Price assumes a validated chromatographic procedure has been provided and that the extraction procedure is relatively straightforward.

Product Safety Labs

GENOTOXICITY - GLP¹

Salmonella typhimurium Reverse Mutation Test
(OECD 471, OPPTS 870.5100)
AMES Test (w/confirmatory assay)**\$4840**

Mouse Lymphoma Assay
(OECD 476, OPPTS 870.5300)
Single Experiment**\$18775**
Independent repetition**\$8100**

Mammalian Chromosome Aberration Test *in vitro*
(OECD 473, OPPTS 870.5375)
Chinese Hamster Cells, Single Experiment.....**\$17350**
Chinese Hamster Cells, Independent repetition**\$8000**
Human Lymphocytes, Single Experiment.....**\$20750**
Human Lymphocytes, Independent repetition**\$8900**

Micronucleus Test *in vivo*
(OECD 474, OPPTS 870.5395)
Peripheral blood
Single Experiment, Standard Version **\$16925**
Single Experiment, Limit Test **\$13410**

Bone marrow
Single Experiment, Standard Version **\$19050**
Single Experiment, Limit Test **\$14600**
All Standard Battery Tests Available POR

NON-GLP¹

P203.UDP Acute Oral Toxicity Up & Down Method
Limit – 2000 mg/kg.....**\$1320**
Limit – 5000 mg/kg.....**\$890**
LD₅₀.....**\$2910**

P204 Acute Dermal Toxicity
Limit test, 10 rats, 1 level.....**\$1390**
Each additional dose level.....**\$1320**

P205 Acute Inhalation Toxicity
Per exposure level, 10 rats
1 hour exposure**\$5230**
4 hour exposure**\$6220**

P202 Primary Eye Irritation (72 Hours)
3 rabbits, 72 hours**\$1000**
Each additional day (if necessary).....**\$60**
6 rabbits, 72 hours**\$1250**
Each additional day (if necessary).....**\$65**

P201 Primary Skin Irritation (72 Hours)
3 rabbits, 72 hours**\$1090**
Each additional day (if necessary).....**\$60**
6 rabbits, 72 hours**\$1340**
Each additional day (if necessary).....**\$65**

P206 Skin Sensitization, Buehler
10 test animals with 5 naive controls
3 inductions with 1 challenge.....**\$6810**
Each rechallenge including
5 additional naive controls**\$1070**

P208 Local Lymph Node Assay
5 mice/group, 3 test, 2 control groups**\$6430**
4 mice/group, 3 test, 1 control group**\$5470**

P214 DOT Skin Corrosion
3 applications, 3 rabbits, 14 days**\$1500**

P214.INVITRO, Corrositex
Non-animal alternative method..... **\$POR**
