

PRICE SCHEDULE - 2010

ACUTE MAMMALIAN TOXICOLOGY – GLP¹

P320.UDP Acute Oral Toxicity Up & Down Method (OPPTS 870.1100, OECD 425)

Limit Test – 2000 mg/kg.....	\$1480
Limit Test – 5000 mg/kg.....	\$980
LD ₅₀	\$3280

P322 Acute Dermal Toxicity (OPPTS 870.1200, OECD 402)

Limit test, 10 rats, 1 level.....	\$1410
Each additional dose level (if necessary)	\$1380

P330 Acute Inhalation Toxicity (OPPTS 870.1300, OECD 403)

Per exposure level, 10 rats, 4 hour exposure, 14 days whole body or nose only	\$ 7960
Grinding of solids	\$470
Analytical concentration determination ²	\$5790

P324 Primary Eye Irritation (OPPTS 870.2400, OECD 405)

3 rabbits, 72 hours	\$1250
Each additional day (if necessary).....	\$70
Max cost \$2510	

P326 Primary Skin Irritation (OPPTS 870.2500, OECD 404)

3 rabbits, 72 hours	\$1390
Each additional day (if necessary).....	\$70
Max cost \$2160	

P327 Local Lymph Node Assay (OECD 429, OPPTS 870.2600)

5 mice/group, 3 test, 2 control groups	\$7890
4 mice/group, 3 test, 1 control group	\$6560

P328 Skin Sensitization, Buehler (OPPTS 870.2600, OECD 406)

20 test animals with 10 naive controls	
3 inductions with 1 challenge	\$8290
With concurrent positive controls	\$9970
Each rechallenge	\$1260

P329 Skin Sensitization, Maximization (OPPTS 870.2600, OECD 406)

20 test animals with 10 naive controls	\$9500
With concurrent positive controls.....	\$12440
Each rechallenge	\$1260

POR – Price on Request

¹ Prices are based on the use of Eurofins PSL's standard protocols and report formats. The use of custom study designs, protocols and/or report formats may result in additional charges. These prices include archiving of data at Eurofins PSL's facility for a period of 5 years. Archiving of data beyond this time will be charged to the Study Sponsor on an annual basis.

² Price assumes a validated chromatographic procedure has been provided and that the extraction procedure is relatively straightforward.

ANALYTICAL CHEMISTRY- GLP¹

P800 Storage Stability/Corrosion (OPPTS 830.6317 and 6320)²

1 Active, 1 Year	\$8810
2 Actives (same method), 1 Year.....	\$11370

P802 Accelerated Storage Stability (OPPTS 830.6317)

1 Active – when conducted with 1 year study.....	\$4460
--	---------------

P803 Characterization of Active (GLP C of A) ... \$4570

P809 Preliminary Analysis (OPPTS 830.1700) POR

P801 Physical/Chemical Properties

- Color and Odor (OPPTS 830.6302 & 6304)
- Physical State (OPPTS 830.6303)
- Oxidation/Reduction (OPPTS 830.6314).....
- Flammability (OPPTS 830.6315)
- pH (OPPTS 830.7000).....
- Viscosity (OPPTS 830.7100)(OECD 114)
- Density (OPPTS 830.7300)(OECD 101)

Other Physical/Chemical Properties Tests

- Miscibility (OPPTS 830.6319).....
- Melting Point (OPPTS 830.7200)(OECD102).....
- Boiling Point (OPPTS 830.7220)(OECD103)
- Dissociation Constant (OPPTS 830.7370) (OECD112)
- Vapor Pressure (OPPTS 830.7950)-static or vp.....
- Partition Coefficient (OPPTS 830.7370/7570) (OECD117/107)
- Water Solubility (OPPTS 830.7840)(OECD105).....
- UV-Visible Spectrum (OPPTS 830.7050) (OECD101)
- Stability to heat (OPPTS 830.6313).....
- Stability to heat & metal ions(OPPTS 830.6313).....

Sample Disposition:

- Sample return
- Hazardous sample disposal.....
- Hazardous sample return.....

GENOTOXICITY - GLP¹
***Salmonella typhimurium* Reverse Mutation Test**

(OECD 471, OPPTS 870.5100)

 AMES Test (w/confirmatory assay)**\$4825**
Mouse Lymphoma Assay

(OECD 476, OPPTS 870.5300)

 Single Experiment**\$15475**

 Independent repetition**\$10505**
Mammalian Chromosome Aberration Test *in vitro*

(OECD 473, OPPTS 870.5375)

 Chinese Hamster Cells, Single Experiment.....**\$14610**

 Chinese Hamster Cells, Independent repetition**\$12630**

 Human Lymphocytes, Single Experiment**\$16950**

 Human Lymphocytes, Independent repetition**\$14725**
Micronucleus Test *in vivo*

(OECD 474, OPPTS 870.5395)

Peripheral blood or bone marrow

 Single Experiment, Standard Version**\$17665**

 Single Experiment, Limit Test**\$14010**
All Standard Battery Tests Available POR
**ACUTE MAMMALIAN TOXICOLOGY-
NON-GLP¹**
P203.UDP Acute Oral Toxicity Up & Down Method

 Limit – 2000 mg/kg.....**\$1220**

 Limit – 5000 mg/kg.....**\$820**

 LD₅₀.....**\$2690**
P204 Acute Dermal Toxicity

 Limit test, 10 rats, 1 level**\$1280**

 Each additional dose level**\$1220**
P205 Acute Inhalation Toxicity

Per exposure level, 10 rats

 1 hour exposure**\$4850**

 4 hour exposure**\$5760**
P202 Primary Eye Irritation (72 Hours)

 3 rabbits, 72 hours**\$920**

 Each additional day (if necessary).....**\$55**

 6 rabbits, 72 hours**\$1150**

 Each additional day (if necessary).....**\$60**
P201 Primary Skin Irritation (72 Hours)

 3 rabbits, 72 hours**\$995**

 Each additional day (if necessary).....**\$55**

 6 rabbits, 72 hours**\$1225**

 Each additional day (if necessary).....**\$60**
P206 Skin Sensitization, Buehler

10 test animals with 5 naive controls

 3 inductions with 1 challenge**\$6260**

Each rechallenge including

 5 additional naive controls**\$980**
P208 Local Lymph Node Assay

 5 mice/group, 3 test, 2 control groups**\$6900**

 4 mice/group, 3 test, 1 control group**\$5730**
P214 DOT Skin Corrosion

 3 applications, 3 rabbits, 14 days**\$1380**
P214.INVITRO, Corrositex

 Non-animal alternative method.....**\$1095**

¹ Prices are based on the use of Eurofins PSL's standard protocols and report formats. The use of custom study designs, protocols and/or report formats may result in additional charges.
